

Outdoor & Leisure

BESPOKE FIRE PROTECTION PRODUCTS

Safegress ™

Safegress™- are the clear leaders in providing Fire Safety solutions throughout all Outdoor & Leisure venues nationwide.

Established and known throughout the UK - we have over 20 years experience in just the Caravan Park industry alone! We manufacture our own range of Fire-point Cabinets specifically for Residential & Holiday Parks, Camping sites & Marinas, ensuring that you and your clients are fully protected in accordance with the law. We design, supply, install, commission and maintain all your Fire Protection systems in accordance with British Standards. A decision to entrust all your Fire Safety requirements to Cheshire Fire Group means instantaneous reassurance for your whole team, from your grounds maintenance personnel through to your High-end sales staff.

Our Consultancy services ensure you get the best of both worlds - who better could you entrust your Fire Risk Assessment to than our fully qualified assessors who have intimate knowledge of the environment, culture and activities typically found in your operations? Providing you with effective solutions to ensure you have achieved maximum compliance at minimum cost.

Whilst our prices are highly competitive, this doesn't mean you get second-rate service; with £10 million insurance cover and our Lifeguard guarantees, you'll instantly find yourself in world-class company - yet we still offer free site surveys and Fire Safety advice to all our clients.

For more information and to place your Fire Protection order, get in touch with the team at Cheshire Fire today.

HR500 - Fire Hose Reel Cabinet

- 50mm Engineered pressed concrete base with apertures for the incoming Water main and optional power feed for Frost stat
- Hot-dipped galvanised base frame & cradle-mount
- Hi-density Polyurethane Insulation, moulded during cabinet manufacture
- Brass or Stainless-steel inserts for external components
- High efficiency optional Heater with Frost-stat- extremely low running costs with our insulated Cabinet
- Integral automatic fire alarm
- 30 metre X 19mm or optional 25mm Fire Hose reel
- Includes lever valve and inlet hose assembly
- Optional Solar-powered beacon
- Installation service offered by our bespoke products division
- All Hose-Reel components WRAS product approval

Failsafe operations have always at the forefront of any of our design considerations, with the new HR500 Fire Hose Reel cabinet we have gone even further; the optional fully-insulated version of this Fire-point housing is packed with features to ensure reliability is achieved irrespective of the environment this Fire Protection equipment can be expected to perform in. Undeterred by frost, rust, rain or extreme heat, this equipment will soldier on for many years, protecting you and your clients in a way that no other products can even come close- from the engineered base through to a fully-galvanized frame, it's hardly surprising that we can offer a 5-year no-quibble guarantee!

Baseline & BaselinePlus

“Cutting down on your Fire Protection expenditure doesn’t have to mean you accept an inferior quality product”

The Sentinel E100 range is designed to meet all your legal requirements and our Baseline specification includes-

1. 2-Section Rotomoulded construction, using latest UV-stabilised technology
2. Base & top components fitted out with Brass inserts for external fittings
3. Laminated Fire Action notice to front face- specify application
4. Laminated OTSA Notice (Open to sound alarm) to both end faces
5. Glass-reinforced Nylon Over-centre Draw-latches (pair)
6. Alarm/strobe unit complete with magnetic reed switch & commercial cell
7. Safely houses 2 x 9lt/9kg fire extinguishers

BaselinePlus specification includes all the above, including-

2 X 9 Litre fully Kite-marked Water Fire Extinguishers, commissioned ready for use

Assured & AssuredPlus

“When you make that conscious decision to go the extra mile, you do it in the knowledge that at some point a lesser product will let you down”

The Sentinel E100 range is designed to meet all your legal requirements and our Assured specification includes-

1. 2-Section Rotomoulded construction, using latest UV-stabilised technology
2. Clamp protection, no more damage by mowers etc
3. Hot-dipped Galvanized Steel quick-release mounting bracket system
4. Base & top components fitted out with Brass inserts for external fittings
5. Laminated Fire Action notice to front face and optional to rear- specify application
6. Laminated OTSA Notice (Open to sound alarm) to both end faces
7. Glass-reinforced Nylon Over-centre Draw-latches (pair)
8. Alarm/strobe unit complete with magnetic reed switch & commercial cell

Factory order options:

- Upgrade external fittings inserts from brass to Stainless-steel
- Upgrade to include Solar-powered beacon
- Upgrade quick-release mounting bracket system to Stainless Steel

AssuredPlus specification includes all the above, including-

2 X 9 Litre fully Frost-protected Kite-marked Water Fire Extinguishers, commissioned ready for use

This Fire Protection equipment is the minimum required by Model Standards 2008 for Caravan Sites in England Caravan Sites and Control of Development Act 1960 – Section 5.

You should also take account of your Fire Risk Assessment which may specify further means of addressing specific risks such as LPG Gas Bottle storage compounds and electrical installations.

Elite & ElitePlus - our Lifeguard Partner

"The success of the astute and discerning owner lies in their recognition of a superior product and service which complies with all the 3 C's; Cost-effective, Competitive and Compliant"

The Sentinel E100 range is designed to meet all your legal requirements and our Elite specification includes:-

1. *Narrow footprint to ensure your equipment doesn't protrude into pathway*
2. *2-Section Rotomoulded construction, using latest UV-stabilised technology*
3. *Co-extruded EPDM gasket fitted to achieve IP65 waterproofing specification*

er

er product
nsistant"

ElitePlus specification includes all the above, plus:-

2 X 9 litre fully Frost-protected Kite-marked & Lloyds Register (MSA-approved) Water Fire Extinguishers, commissioned ready for use, including anti-corrosion inhibitor

Lifeguard Warranties:-

This product is our model of choice for any Holiday Park or Marina in the coastal regions of UK and other areas where they may be vulnerable to corrosive, toxic or other hostile atmospheric conditions and is indeed the specification upon which we can confidently offer you our Lifeguard Warranty, a unique no-quibble guarantee for your extinguishing appliances against corrosion, loss of pressure, frost damage and fading signage. Our confidence is inspired by the ability to achieve complete exclusion of a hostile environment to the interior of the Cabinet, therefore keeping critical Fire Protection equipment in first-class operational condition.

We will be glad to enrol you in this scheme - in many cases we can even include your existing equipment. Simply ask to be put through to our service department after you have placed your

Cabinet/extinguisher order, they will assess your requirements and give you no-nonsense fixed costs to get all your Fire Protection equipment included in our all-embrative maintenance programme- you can be rest-assured of one thing; you'll never have to worry about your maintenance costs ever again!

Meet the rest of the family ... Wall-mounted Cabinets

Designed for those awkward situations where wall-mounting for your Fire Protection equipment is the only viable option, these units are robust, fully waterproof and will protect your Fire Protection Appliances in the harshest of UK environments. Ideal for Toilet Blocks, Gas Compounds and External Workshop areas

E10 & E10 Plus

E10 Single-extinguisher cabinet is fully water-proof and can hold up 1 x 9 Litre Water/AFFF Foam unit or 1 x 9 Kg Dry-powder Units. Available with or without extinguisher.

The unit is complete with Extinguisher retainer and is also available with a self-contained automatic alarm unit.

In addition to siting Fire-point boxes at a maximum of no more than 30 metres travel distance from the Caravans, all other specific Fire Risks on the site should be addressed by Fire Extinguishers containing an extinguishing medium appropriate to the risk.

For more advice on what this may mean for you and your organisation, simply get in touch with us on 03335 773355.

E20 & E20 Plus

E20 Double-extinguisher cabinet is fully water-proof and can hold up to 2 x 9 Litre Water/AFFF Foam units or 2 x 9 Kg Dry-powder Units. Available with or without extinguishers.

The unit is complete with Extinguisher retainers and is also available with a self-contained automatic alarm unit.

Fully-automatic Solar Beacon

Naturally better:-

Your new E100 Fire-point Cabinet now has the capability to fully meet the demands of legislation; Fire Protection equipment is required by law in accordance with the Model Standards 2008 and this document also sets out requirements pertinent to the siting of the Fire-points:-

“the siting of the fire points should be so that they are visible at all times, and marked in a way that makes it obvious as to what they are”

Practically, it is not always possible - or desirable - to place your Fire-point cabinets under/adjacent a street light, however, this situation can now be met when you specify this device with your order.

Our design team are always looking for eco-friendly methods to meet legislation, so a Solar-powered beacon was our natural choice

- Size: 12.3 X 10cm
- Fixing: M4 Stainless-steel torx panhead machine screws
- Solar panel: 5V 70mA
- LED number: 6pcs
- Material: PC Hull/ABS base
- Storage battery: 2pcs 3.2V lithium battery
- Auto dusk/day on off
- Relative luminance: 300LUX
- Full recharge use time:over 30hrs
- Frequency: 9.26Hz
- Visual range: 200M

Fire Extinguisher Servicing

**CHESHIRE
FIRE**

We have a highly experienced team of engineers on hand to carry out servicing, maintenance and repairs of all Fire Extinguishers and Fire Hose Reels at any UK site.

All our service vehicles carry the necessary spares to ensure that your fire-point cabinets and fire extinguishers are maintained in tip-top condition irrespective of what make, type or size they are - inclusive of fire hose-reels which likewise should be serviced to BS5306 Part 6.

Regardless of their age, all fire extinguishers must be maintained to standards laid out by BS 5306 part 3 stipulating that annual inspection by competent & trained persons - alongside more extensive servicing on a periodical basis - be performed. Not only is this a legal requirement, it is also paramount to maintaining maximum fire safety on the site

Did you know that the cheap equipment that can be bought off the internet may not comply with legislation? All new equipment must be commissioned by a competent technician and must bear a commissioning label with the name of the Company and initials of the Technician,

Cheshire Fire are available for regularly scheduled and one-off fire extinguisher servicing and maintenance work, and for your further reassurance, the company is fully insured with maximum efficacy cover.

For more information, don't hesitate to get in touch today, and our team can provide you with a free quotation for any of our services.

why your extinguishers should be serviced- note this faulty gauge removed yet still shows pressure OK!

Fire Alarm & Emergency Lighting Maintenance

**CHESHIRE
FIRE**

The key component for any Fire Protection plan lies in the effectiveness of your Fire Alarm and Emergency Lighting systems - and it is crucial that this equipment is properly maintained for the safety of your clients and staff.

Cheshire Fire have many years extensive experience with this equipment and are able to offer you an unsurpassed maintenance program - irrespective of the make or size of your system. Our engineers carry all the equipment on service vehicles necessary to keep all your Fire Protection in full operational order in accordance with British Standards.

Cheshire Fire also carry out the design, supply and installation of your Alarm and Emergency Lighting systems - often an integral component to your building's Fire Protection. These systems are an under-rated yet vital element to the survival or otherwise of you, your clients and your staff, should Fire break out, catching you unawares.

Code of Practice

Design, installation & maintenance of this apparatus is carried out in accordance with the requirements of British Standard Code of Practice BS 5839 Part 1 (Fire Alarm & Detection Systems) & BS 5266 part 1 (Emergency Lighting) which recommends that periodic inspection of your equipment should be carried out in accordance with a prescribed schedule.

For more information or to obtain a quotation for your maintenance, please contact ourselves today.

Consultancy Services - Fire Risk Assessment & Fire Training

October 2006. The biggest wake-up call to Fire Safety legislation for over 30 years was introduced to England and Wales. The cornerstone to Fire Safety in any Organisation is that oft-used buzzword of the 21st century: *risk assessment*. In addition, every

Organisation - not just Caravan Parks, Holiday Sites & Marinas - but most Businesses, Schools, Community Centres, Churches, Village Halls etc, are required to identify their responsible person. What's more, this Fire Risk Assessment and the relevant arrangements will have to be reviewed annually.

Cheshire Fire have carried out many thousands of these assessments - each one different in some unique way - and we enjoy working with our clients to achieve compliance without incurring unnecessary costs and inconvenience- all our assessors are either MIFireE, GIFireE or NEBOSH accredited personnel and fully insured under our Professional Indemnity.

We also carry out Fire Training for your staff - this can either be done in-house or at your venue, our courses include Fire Warden, Management and Fire Extinguisher use and provide you and your staff with an unforgettable experience as they learn to use Fire Extinguishing equipment on our live fire rig - for more information, simply call us today.
